

TRANSFORMING YOUR CLINICAL DATA

From Scribotech transcription services to Augnito voice recognition technology.

Scribotech has been providing medical professionals with accurate, efficient, cost-effective services and technology to support clinical transcription and impeccable attention to patient data detail since 2001.

20 YEARS

of medical transcription
and dictation expertise

100% FOCUS

on error-free quality,
consistency and accuracy

NHS FRAMEWORK

approved vendor
since 2005

500

transcription specialists
worldwide pre Augnito

>100 MILLION

minutes of dictation
processed

UKAS CERTIFIED

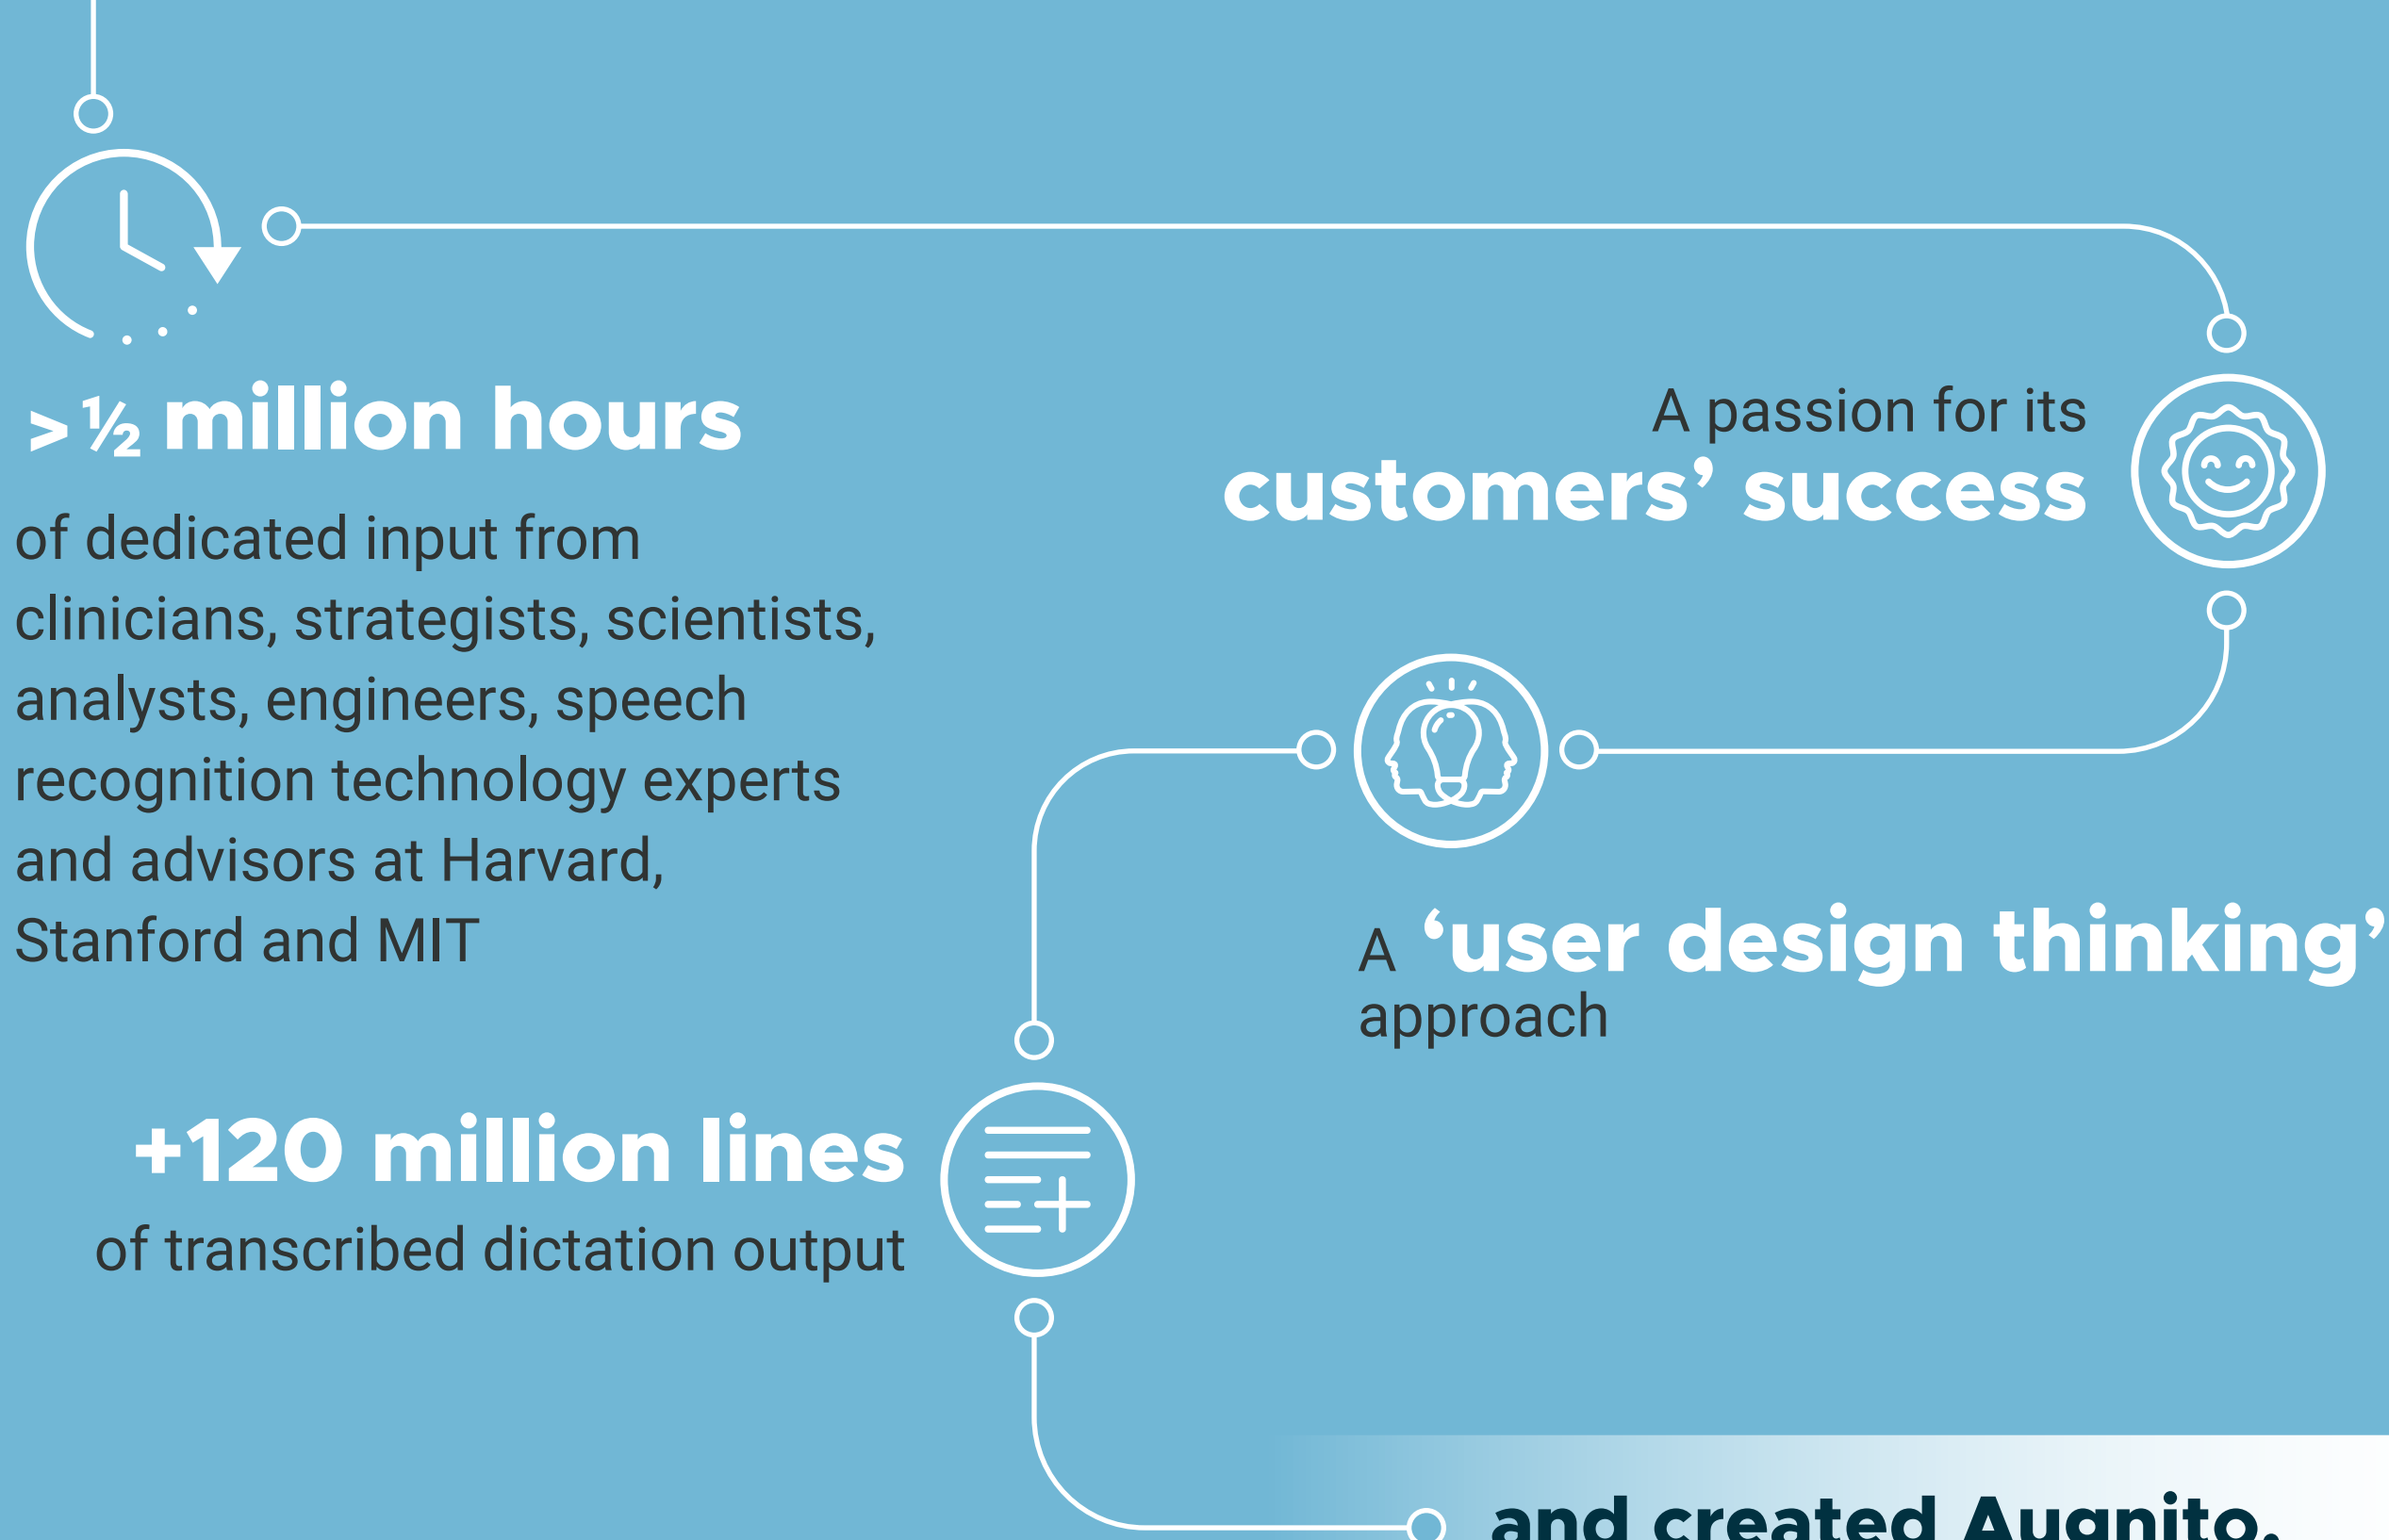

for ISO 9001,
14001 and 27001

A journey of clinical data management innovation.

Scribotech combined

2 decades of transcription experience

- of these, **16 years** were dedicated to NHS medical transcription fulfilment
 - of these, **6 years** were spent on core speech engine R&D
 - and **2 years** on a build-test-learn process

AUGNITO

Shaping the future of patient data capture and healthcare

Putting your voice in control of clinical data entry.

- Secure, cloud-based AI-driven, clinical speech recognition.
- At-the-cursor data entry in any MS Windows clinical system.
- Multiple medical specialty-specific language models.
- No voice profile training needed.
- Speech recognition wherever you need it – at a desktop, on the web or on a smartphone.
- Speech-enablement for EPRs and clinical systems via easy API with SDK integration and a Developers' Portal for software developers and integrators.
- Enabling you to streamline your clinical workflows.
- Fast, easy, accurate capture of live clinical data on any device.

Inviting you to innovate tomorrow's speech recognition today.

Healthcare execs, ops management, radiologists, cardiologists, clinician consultants, GPs, digital transformation teams and healthcare tech experts are already shaping the future with Augnito, through AVAIA - the Augnito Voice AI Innovators' Alliance.

As a Scribotech customer and partner you can transform patient data capture

- Augnito will free you up to provide better patient-centered communication, more eye contact and more non-verbal interaction = higher patient satisfaction.
- Augnito removes the tech hardware barriers between you & clinical data entry, **giving you more time to listen to:**
 - what clinicians need in terms of voice-AI solution enhancements
 - what IT and Digital Transformation teams need
 - which features work, which don't
 - what improvements would be great to have vs. wishful thinking.
- By feeding your 'listening' back to our development team, we'll make the future happen - faster, simpler and more effectively.

What does AVAIA give you in return?

- Updates on Augnito innovations and user-tips.
- A dedicated agile development team that makes you a priority.
- Know-how from voice-AI experts.
- Insider peeks into the future of Augnito e.g.: latest voice biometric solution plans (development instigated by input from Augnito clinician partners around the world).
